

We're Going On Shape Hunt

Hope you are all well and looking after yourselves!

We're Going on a Shape Hunt

Michael Rosen Helen Oxenbury

A game for both indoors and outdoors. Also an opportunity to reinforce mathematical vocabulary that you children need to know.

You can download shape mats from Twinkl.

Look for shapes in the environment, both natural and man-made and both 2D and 3D

Each time search for a different shape. Keep a tally chart of how many you find or record on a simple map.

Give clues such as...

I'm looking for a shape that has 4 straight sides, all sides are equal etc

I'm looking for a shape that has one curved side and 1 straight side.

I'm looking for a shape with 6 faces, some are rectangular, and some are square.

See below some song links

<https://www.youtube.com/watch?v=24Uv8CI5hvI>

<https://www.youtube.com/watch?v=2cg-Uc556-Q>

<https://www.youtube.com/watch?v=uZ8Jy1xggPU>

Please note some schools use the term oblong instead of rectangle

Happy hunting! *Sarah*
